To Whom it May Concern:

I am very excited to see a center that will be child and family focused, designed to enhance care, and developed with a level of compassion and professionalism that will set Mississippi as a gold standard for children's skilled care. Many states struggle with complex children that have become "stuck" in hospital settings that are simply not prepared for long term care of children. Mississippi has recognized this particular need and is preparing to meet the challenge by developing the Mississippi Center for Medically Fragile Children. The Center will not only meet the needs of existing children but offer an improved environment to enhance complex care need of future fragile children. I can attest that there is no more deserving population of children than the children for whom this facility has been designed to care for.

If I can give further support or insight into the need for such a facility please feel free to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Teresa Fink". The signature is written in a cursive style with a large initial 'T'.
